Total time taken	11 min

Hey there. I'm Christian Torphy, and I'm a website designer. Today, you are just going to look through and interact with this website named Exploratour. It's a website where you can find information about tourist destinations around the world, and you can buy plane tickets, book hotels, and find general information about the target destination. This experiment should take about 5 to 10 minutes, since you are not actually booking any vacation. The site will be preloaded with different locations throughout the world. Don't worry, this is just a small test, and no video or audio will be recorded, nor will any personal information be collected. This is just a user experience experiment to see what should change about the site. If there are no further questions, let's get started!

User's opinions/comments/suggestions about the site
What does the user like about the website? - The presentation and the layout of the site are nice - The site provides a lot of good information for traveling What does the user dislike about the website? - It is difficult to find some options because there are too many options in the tab - The website could use some organization, so it is easier to find what the user wants User suggestions - The user suggests making improvements in the organization, like separate tabs to separate the content
The "Thank You" note to conclude the test
That will be everything for this experiment. Thank you so much for your time and feedback today.
Your experience, assessment of the Usability Test
The user's feedback is very useful to us as it helps us improve the website even further. We now know that we need to organize the content so that things are easier to find.

Member Name	Andrew Sperano

Participant gender	Female
Test Date	April 28th, 2026
Test Time	6:30pm
Total time taken	8.5 minutes

- *Hi there, thank you for participating in this website test today. My name is Andrew, and I'm a computer science student working on a website project. This session will take about 10–15 minutes and is meant to evaluate how easy and well the website is to use. This test is only about the website and your experience, and your feedback helps identify what works and what doesn't. The site focuses on exploring destinations more deeply and booking travel and accommodation, but you will discover how it works as you go. Your participation helps improve the overall experience, and I'm mainly looking to understand how intuitive the site feels. Feel free to share your thoughts as you complete the tasks.*

Create an account / login	Completed successfully: yes/no Time taken: in 25.63 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Access the account page	Completed successfully: yes/no Time taken: in 5.18 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Navigate to a destination page	Completed successfully: yes/no Time taken: in 15.41 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Navigate to the transportation page	Completed successfully: yes/no Time taken: in 10.05 seconds Facial expressions: none Any noises made: none

Navigtate to the itinerary page	Completed successfully: yes/no Time taken: in 6.33 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Get an estimated total for a trip to Morocco for 5 days. Make it a Luxury travel style.	Completed successfully: yes/no Time taken: in 37.25 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Navigate to the food page and learn about the types of food available.	Completed successfully: yes/no Time taken: in 8.08 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Access the travel checklist page	Completed successfully: yes/no Time taken: in 10.33 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Book a trip from the 'Deals' page	Completed successfully: yes/no Time taken: in 37.77 seconds Facial expressions: none Any noises made: none Any other gestures made: none
Search flights for 1 person to Morocco for 5 days.	Completed successfully: yes/no Time taken: in 36.00 seconds Facial expressions: questioning Any noises made: "Hm" Any other gestures made: made a weird hand gesture

User's opinions/comments/suggestions about the site

What did you like about the website?

- “The layout was clean and easy to understand. I liked how the destinations were organized and that it was simple to click into different continents and see more countries presented.”

What did you not like about the website?

- “Some parts of the navigation were a little confusing at first, especially figuring out how to get back to the homepage. Also, there wasn’t always enough detail on certain pages.”

What suggestions do you have to improve the website?

- “Adding clearer navigation buttons or a more visible menu would help. It would also be useful to include more detailed descriptions or images for destinations and trips. And I think the only ‘big’ issue that I found was when I was trying to book the flight(s). After I entered all the information, the page didn’t give any kind of indication that I booked the flight, rather, the page just refreshed, and all of my info was removed.”

The “Thank You” note to conclude the test

Thank you again for participating in this usability test. Your feedback was helpful and will be used to improve the overall design and functionality of the website. I appreciate your honesty and the insight you have provided me. If you have any additional thoughts after this, please do share them. Thanks again.

Your experience, assessment of the Usability Test

Overall, I think the usability test provided a lot of useful insight into how a user would interact with this website and also where we need to make some improvements. I think the navigation was good overall, the only thing I didn’t necessarily love was the fact that the flight page didn’t work as anticipated.

Total time taken	25 minutes

Insert here the introductory speech you gave to the participant to put her at ease and inform him/her about what is expected. You know from our Usability Testing lectures, and videos that an introduction is necessary.

The following items must be present here -

- *Your formal introduction*
 - *Your name*
 - *What you do*
 - *And so on*
- *The purpose of the session and the time it might take*
- *Put the users at ease by ensuring that they are not being tested in any way, but rather they are helping us by testing a product for us!*
- *Explain about your website – do not give them too many details, we want them to explore and find out.*
- *Explain how the participant is helping you by participating.*
 - *Explain what you expect to find*
 - *Do not tell them exact results that you hope to find, you will bias them that way*
 - *Explain to them that you are trying to get a general understanding of the site's usability, what works and what does not for a user.*
- *Now point them to the website that they will have to test by giving them the URL.*

Team Assessment

Usability test results, discussions, analysis
<i>It is clear that we have a good website to begin with, however, there are a few things that we need to improve on to make it that much better. We want to enhance navigation by sorting content into little tabs and adding more page elements to improve usability.</i>
Accessibility issues
<i>We have the same three issues. We will improve readability, organize labels to improve navigation, and add page elements to improve overall usability.</i>
HTML Markup issues
<i>The stray button tag. We will be sure to remove it.</i>
